Winter Driving Safety & Sharing the Road

with Snow Plows-Things to remember

1. Slow down. Speed is the #1 cause of winter crashes.
2. Prepare your vehicle for winter driving.
3. Maintain your distance to avoid collisions and damage from flying sand & salt.
4. Move your vehicle to the left of your lane so the equipment operator can see you in the mirror.
5. Snow plows cause soft snow to swirl, making it difficult to see the plow & for the plow operator to see you.
6. Snow plows usually leave a ridge of snow, making passing hazardous.
7. Turn on your headlights and windshield wipers for additional visibility.
8. Snow removal equipment may have to slow down, stop or back up. Beware!
9. Make sure your cell phone is charged.
10. Follow the same route to and from work or activities, let someone know this route if you need to be located they will know where to start looking for you.

DRIVEWAY CLEARING TIPS

1. **Do not shovel, blow snow or have your driveway plowed into or across the road. This is prohibited by law and can cause a serious traffic hazard. If possible, it is best to place snow on the side of your driveway opposite direction from which the plow is coming. That way, the plow will carry snow away from your driveway rather than back into it.**

2. If possible, wait until the road has been plowed before cleaning out the end 5 to 10 feet of your driveway. There is no practical way to plow the road without depositing snow into your drive way. Please understand the Town cannot go back and shovel or plow out the end of any private driveway.
3. Do not allow children to play on snow banks along the road. Warn them not to tunnel or build snow caves along the road. Snow plows may need to open up vision or push back snow banks to provide storage room for future storms.

PLEASE KEEP YOUR PARKED VEHICLES OFF THE ROADS DURING SNOW!
